

## Tap into the expertise of Managed Maintenance to meet you organization's inventory management goals.

### At a Glance

Inventory Management Select (IMSelect), offered by Managed Maintenance, is a comprehensive service that helps organizations solve their inventory management challenges and protect the key technology assets responsible for driving and supporting customer's business initiatives. Customers are provided a go-to resource and access to a secure, dynamic and easy-to-use web portal, helping them save money, improve processes and increase productivity.

*"We now have the capability to keep all of our equipment under one managed contract, and we have excellent views into the status of our equipment... Managed Maintenance has been instrumental in helping our business consolidate inventory and put processes in place so we can spend more time focusing on our business operations."*

### What is IMSelect?

Managed Maintenance IMSelect offers a go-to resource to help you simplify the management of your contracts and assets which helps you realize significant cost savings.

Tap into the expertise of Managed Maintenance, access a dynamic web portal, and identify the best solutions to meet your organization's inventory management goals.

The IMSelect program provides you the guidance, knowledge and platform to take control of the inventory challenges that organizations struggle with on a daily basis. By aligning customer needs with our proven methodology, the IMSelect resource and the customer together create a cooperative approach toward shared success.

Our IMSelect team draws on hundreds of years of maintenance contract and asset management experience to resolve the issues that can impede ROI on technology investments. We help customers tackle each assignment with the latest tools and best practices to ensure they stay focused on their core business, which ultimately increases productivity and reduces administrative overhead.

### IMSelect Program Benefits

- Reduction in administrative support costs and time; free up valuable resources
- Dedicated specialist for all moves, adds, changes and inventory questions
- Proactive contract and inventory reconciliations
- Software maintenance research and studies
- Prevent downtime and stop paying for support on retired assets

## How Can IMSelect Help Your Organization?

Consisting of a team of experienced inventory and contract specialists, IMSelect offers services that can help you to achieve significant savings on your organization's data resources by consolidating the administration of all hardware and software support services.

IMSelect is a comprehensive program that proactively manages the key hardware and software assets responsible for driving and supporting your organization's business initiatives. Through consolidating your hardware and software administration (including hardware maintenance and software support), you will be able to streamline manageability, improve productivity and increase efficiency – all while reducing costs. You will also have added peace of mind in knowing that these assets are being well-maintained and protected.

We also provide additional value by assigning a dedicated specialist to your infrastructure. This individual is your single point of contact, dedicated to supporting your organization with any service need, including problem resolution. You will receive proactive notifications and up-to-date information as it pertains to your contracts and assets.

## The dynamic web-based portal allows you to:

- View contract and asset details 24/7
- Budget for future purchases
- Generate reports quickly
- Store digital documents remotely
- Receive proactive service expiration alerts

## Get Started Today

If your organization is struggling with the responsibility of capturing, managing, delivering and preserving asset information, the Managed Maintenance IMSelect program can help. The ability to track contract expirations, warranty end dates and software support and to update information accurately is challenging and not to be left to chance. Our skilled specialists are here to guide your organization and deliver unparalleled value, making your life easier.
